ATEK PLASTICS RECEIVES AN “A” REPORT CARD

KERRVILLE, TEXAS-- ATEK Plastics, a full-service precision injection molder, is ranked in the top 2% for performing plastics processors according to the North American Plastics Industry Study.

Partner and Plastics Industry Practice Leader at Plante & Moran, Jeff Mengel, visited the Kerrville facility on August 24, 2010, to review the NAPI Study results with ATEK’s management team. ATEK Plastics received an “A” in almost every category but most importantly in financial results and value added categories. “As a plastics processor, the NAPI study helps us to benchmark ourselves against competition to enable us to make strategic moves to enhance our business and growth,” says Tom Houdeshell, President of ATEK Plastics.

As the list of plastics processors has shrunk from 15,000 to 6,000 in the past decade and many processors continue to struggle in today’s economy, ATEK Plastics has consistently increased its profits by since 2001 with only half of the staff as other molders their size.

About NAPI Study

The North American Plastics Industry Study started in 1995 and it benchmarks 200 top plastics processors annually on strategy and marketing, financial performance, human resources and operations.

About ATEK Plastics

ATEK Plastics is a medical ISO certified precision injection molder that provides cost effective components on-time to companies demanding quality and expertise. Their state of the art facility houses a full service tool room, quality lab and a technology driven molding floor with portable clean room capabilities. Staffed with experienced engineering and management, ATEK can make your design a reality. No compromise, the A-Team will meet or exceed your requirements every time.
